How to help your child at home

How can you help?

You can help in many ways.

Please encourage your child to regularly use Numbots and TTRS as their fluency is vital.
(see links below)

If you need a copy of their username/login, do not hesitate to contact your child's teacher.

Additionally, KS2 children will be given homework through MyMaths, this is because it has lessons that explain how they are taught and it has practice questions too.

If this helps you to help your child with their maths at home, then it is definitely worth the time spent. Alternatively, you could use many resources, some additional links are below.

Free help to improve your maths skills and confidence

The [National Numeracy Challenge](#) is a free, online learning tool designed to help you improve your everyday maths skills in manageable steps whilst building your number confidence.

The National Numeracy Challenge is based on maths in the real world - at home, work or supporting children. It is free to use, can be used on any device, including mobile phones and can be installed as an app - simply lookout for the 'install app' button when you visit the Challenge.

The Challenge has unique features, including:

- ✓ Numeracy skills check – a short one to get you started and a longer one to get an accurate gauge of your skills.
- ✓ Learning resources – to help you learn every skill you need to be numerate
- ✓ Attitudes resources – to help make learning maths a bit easier and less stressful
- ✓ Interactive content – such as videos from beneficiaries, quizzes, myth busters and tips
- ✓ Resource hubs – supporting children's education, managing money and work
- ✓ Technology that adapts to your own individual learning level, with 300+ questions
